**Notes on The Tasmanian Devil**

The Tasmanian devil's name derives from its sound, appearance and apparent **(31)** \_\_\_\_\_.

The **(32)** \_\_\_\_\_ record shows it was once common all over mainland Australia, until **(33)** \_\_\_\_\_ and the dingo led to its extinction there.

The Tasmanian devil was originally exterminated as a **(34)** \_\_\_\_\_, but is now an icon.

The Tasmanian devil escaped extinction with protection by law.

The Tasmanian devil is found in nearly all Tasmanian habitats in varying **(35)** \_\_\_\_\_, although they tend to be most numerous near where they can find a good availability of food.

The Tasmanian devil usually lives underground and doesn't like to move. Therefore, **(36)** \_\_\_\_\_ of dens can be very disruptive.

The Tasmanian devil will scavenge on most dead animals – this helps prevent the spread of disease, as their feeding prevents the breeding of maggots.

The Tasmanian devil is a famously noisy eater – this behaviour allows it to establish **(37)** \_\_\_\_\_ amongst its peers.

The Tasmanian devil is nocturnal and can travel quite a long way at night. The young are more agile and can climb.

The Tasmanian devil is not **(38)** \_\_\_\_\_, but remains usually in one area.

Although seemingly aggressive, the alarming sounds from a Tasmanian devil stem from fear rather than aggression.
